

## **2”, 5 Point Latch & Link, Pull Up or Pull Down Laps with Aluminum Adjusters**

This fully customizable belt set features the smallest buckle package in industry while boasting the strongest shoulder and sub belt tongues along with our strong and comfortable webbings in our shoulders and laps.

The forged tongues are not only offer unmatched strength, they also bring the shoulder belts into a tighter “V” going into the buckle. This helps the shoulder belts stay on your head restraint and control the upper torso much better than our competition’s stamped hardware that bends on heavy impacts.

The Sub strap tongue is also a forged piece that shortens the buckle package going down into the groin area. Our attention to detail and comfort on the sub strap is shown in the sew patterns and sewn “pinch” on the 5-point strap.

The black tongues and silver buckle allows the driver to better see that the tongues are on the buckle in a dark cockpit at your local short track.

This belt set is also available in a Lightweight version for all of you that need the ultimate in strength with weight reduction.

**Retail = starting at \$225**

## 6 Point Latch & Link, 2” Shoulders and Lap Belts

Based on our 5 point Latch & Link, the innovative 6 point sub strap assembly is another first for the industry.

The Small Tongue Latch & Link 6 point sub strap showcases our innovations and ability to provide the ultimate in comfort and function for the biggest wrecks.

This belt assembly is available in a fully customizable configuration.

The Small Tongue Latch & Link 6-point will turn to the inside of your legs while driving and spread your legs in an impact. This is much different than the “V” style traditional 6 points which make the webbing dig into your legs during driving and especially during impacts.

The Small Tongue Latch & Link 6-point can also be paired with our 5-point to make a 7-point. This assembly is the safest sub belt in the industry and still features our small tongues which give your groin the most room in the industry.

Starting at \$250

## **2", 5 Point Latch & Link, Pull Up or Pull Down Laps with Aluminum Adjusters & Ratchets**

This fully customizable belt set features the smallest buckle package in industry while boasting the strongest shoulder and sub belt tongues along with our strong and comfortable webbings in our shoulders and laps.

Available with 2" or 3" Single or Dual Ratchets for your confidence.

The forged tongues are not only offer unmatched strength, they also bring the shoulder belts into a tighter "V" going into the buckle. This helps the shoulder belts stay on your head restraint and control the upper torso much better than our competition's stamped hardware that bends on heavy impacts.

The Sub strap tongue is also a forged piece that shortens the buckle package going down into the groin area. Our attention to detail and comfort on the sub strap is shown in the sew patterns and sewn "pinch" on the 5-point strap.

The black tongues and silver buckle allows the driver to better see that the tongues are on the buckle in a dark cockpit at your local short track.

**Retail = starting at \$325 for single Ratchets / \$385 for dual Ratchets**
